

Target Hopscotch

To play this game you will need to create your own hopscotch area using chalk or write down numbers on sheets of paper.

- 1) Throw an object (bean bags, socks) onto one of the numbers (number of points= number the object lands on)
- 2) Hopscotch to the number the object lands on and bring the object back to the start
- 3) How many points can you get in 1 minute?

Simplify

- Create larger area for each number
- Throw more than one object

Progression

- Have to select a number to aim at before throwing
- Family member to provide a maths question before you can throw the object
