

How to Make Your Own Hockey Stick

You will need:-

- Walking stick or umbrella or something similar.
- Scissors
- Card or paper
- Blu-tac or Sellotape
-

1. Cut out a strip of card as in the picture. The bigger strip you cut out, the easier it will be to dribble the ball. The smaller the strip you cut out, the harder it will be to dribble the ball.

2. Fold your strip of card in half and blu-tac to the bottom of the umbrella, handle of walking stick or whatever else you are using.

3. Turn the walking stick/umbrella upside down so the card is now almost touching the floor, while you are holding the other end.

Left hand at the top of the handle and your right hand just below as in the picture above.
