

Mathletics: Information for Parents

Mathletics is helping children at Great Hollands to enjoy maths and increase their breadth and depth of mathematical understanding.

Mathletics has many different aspects, from quick-fire calculations, times table music videos and interactive tutorials in line with the maths topics covered in the primary curriculum. This page will show you how you can support your child in using Mathletics at home.

The Basics

All children from Reception to Year 6 will have access to Mathletics through their own username and password. This gives them access to all the mathematical games, resources and activities. If your child does not have a username and password, please contact the class teacher who can organise setting one up for them.

Mathletics activities may be set by the class teacher for homework. Once logged on, your child will not have access to all the games and activities until the given homework activities have been completed. It is important that children do their best in these activities as the scores are stored and can be viewed by the class teacher.

Mathletics can be accessed on PC / Mac, iOS and Android devices as well as Windows tablets and Chromebooks. For use on iPads, Mathletics can be accessed through Safari, or downloaded as a free app. [Full technical specifications](#) can be found on the Mathletics website.

While using Mathletics, one top tip is to avoid pressing the 'back' button on your browser, and use the buttons within the Mathletics webpage instead.

If you need any help or support with Mathletics for your child, please speak to your child's class teacher.
