mat

We will be making a story map to help us retell the story 'How to Catch a Star'. We will use this and actions to help us! Last week, we read the story 'Perfectly Norman' by Tom Percival. It is about a perfectly normal little boy who one day, grew a pair of wings. The story is about his journey of accepting his and everyone else's differences, realising there is no such thing as normal! This week we will focus on learning some of the vocabulary in this book including extraordinary, uncomfortable, swooping, miserable and wonderful. In phonics, we are now learning special friends. We will all be practising oral blending, reading green and red words, practising writing sounds and spelling words with the sounds we know well. We are all practising writing CVC words, most of us are writing them in phrases with finger spaces.

Maths

In Maths, we will be reciting numbers to 20 and back. We will learn to recognise the number 18 and count 18 objects. We will practise reading numerals to 20 and writing our numerals. During the week, we will explore solving mathematical problems practically, using addition and subtraction. We will also be thinking about how we can record and show our thinking.

Messages

Topic

We start our new topic this week 'People who help us to stay safe, healthy and well'. We will be thinking about people who help us when we are ill, like doctors and nurses, plus dentists and opticians, who keep our mouths and eyes healthy. We will be learning about the importance of hygiene and washing our hands before we eat and after using the toilet. We wash off germs we may have picked up on our hands to stop us from putting these in our bodies! We will compare Florence Nightingale to a nurse today and read a book all about Holi.

We will be celebrating World Book Day on Friday. In celebration of bedtime stories, we are allowing the children to come into school on the day wearing suitable PJs / onesies or loungewear. They should also bring in one of their favourite bedtime books to share with the class. There is no donation required for this event.

Reception class will be open as normal on Thursday.

Your child has passwords in their reading folders to access Ten Town and Oxford Owl at home. Please let us know if you are having difficulties with these. Both of these sites provide some great online support for their class learning.

We are continuing to practise our learning about 'whole body listening' to make sure that the children are listening and showing respect with their whole body focused and paying attention to the person speaking. This is an excellent tool for them to develop which will help them learn how to manage their distractions.

How can you help at home?

Please continue to practise oral blending with your child daily. If they can blend 3 sounds then please extend them to 4 to help them progress in their reading. The Fred game links and Oxford Owl activities will help with this. Please practise sounds daily and listen to your child read if they are bringing home words, sheets and/or books. Some children are now learning the first six set 2 sounds and these can be trickier. Please continue to practise reading all the sounds they have learned.

Please share books and read to your child every night if you can. Try and develop a love of reading that will stay with them for the rest of their lives! The children are able to select a school book to bring home, for you to enjoy together. They should return the book each Friday to exchange for a new one.

Ten Town will give your child access to all the stories and songs they know and a range of activities designed to develop their understanding of numbers.

You can also support your child's Maths learning by undertaking some of the suggested activities from the maths home learning.

Learning from last week

If you have any comments, concerns or questions, please come and speak to Mrs Kalampaliki or Ms York.

We hope you all have a lovely week!
