## **History Curriculum**

# History Curriculum

At Great Hollands Primary School, we deliver History subject skills and understanding through topic-based learning which is linked to the National Curriculum. It is carefully balanced to give children opportunities to explore a range of age-appropriate historical periods throughout the ages - beginning with the Stone Age through to the 21st Century.

The knowledge and skills covered through History are carefully structured to link to other parts of the curriculum. Learning is interweaved into Writing, Reading, Art, Design & Technology, Music and where appropriate e.g., Maths. Specific topics have a History base so that we develop historical thinking; analyse historical sources and evidence, make historical connections, make chronological reasonings and create and support historical arguments. Knowledge of significant historical events, people and places in our own locality is also taught to give children a rich understanding of events which have transpired in the past and how those impacted Britain and the wider world.

History is taught through a variety of approaches to provide opportunities for children to dive deeply into the past to gain a thorough understanding of who, what, where, when, why and how events transpired. Children learn through; visual and audio representations, discussion and debating, role playing and comparing and contrasting.

In Early Years and Key Stage 1, children are taught a variety of historical topics to provide them with basic historical investigation skills, through learning about famous people from Britain's past.

In Key Stage 2, children will build further on these skills by exploring historical events in greater depth chronologically through the years, continually linking back with Britain today.
