

GHPS Science Fair

23rd May 2025

Dear Parents and Carers,

We are excited to be having a Primary Science Fair to launch our Phizz Science Lab, which has been created in partnership with The Ogden Trust. The children have all been invited to participate by doing a science project, either by themselves or with a friend.

The project can be an experiment to answer a question, a problem and solution or a research project. It can be on any area of science that interests your child. Questions could be something like 'How many stars can we see?', 'Do plants need light to grow?' or 'How does a hovercraft work?' You could use the internet for further ideas.

When your child has carried out their investigation or research, they have to make a display board to communicate their learning to others. This needs to have three panels of information (as shown) and can be made from a large cardboard box, opened out, painted or covered in wrapping paper and held together with tape.

This display board should show the project title/question/problem, what your child thinks the answer is, what they did, what they found and a conclusion. If they want, they can include a small model or experiment and/or project notes.

All projects need to be in school in the week beginning **Monday 23rd June** and our School Science Fair will take place during the week of **30th June**. Children will have the opportunity to visit the fair and we will be inviting parents too! A panel of judges will help to choose the best projects. Prizes and certificates will be provided.

We are really looking forward to seeing lots of amazing projects!

Kind regards

Great Hollands Primary School
