‘Doodlers’ in Panthers Class

Dear Parents and Carers

As you will be aware, your children have been busy making their very own “Doodlers” in their DT/Science lessons in recent weeks.

These clever creations use a motor to move around and draw fun, colourful patterns. Each Doodler is made from simple materials like plastic cups, felt tips, motors and batteries, and your child has been hands-on in the building, decorating, and balancing of their unique machine.

The project has encouraged creativity, problem-solving, and teamwork, as the children explored how circuits, motors, and balanced designs work. They experimented and made decisions to help their Doodler create the most interesting patterns possible - and had lots of fun along the way!

If you’d like to keep your child’s Doodler as a special memento, we are offering you the opportunity to purchase them for a small amount to help cover the costs and support more fun DT projects.

Please send payment of £2.00 to the school office by Friday 5th June, and your child will be thrilled to bring home their Doodler and show you how it works.

Thank you so much for your support. We hope these creative gadgets make you smile as much as they made us smile while making them!

Kind regards

Mrs G van der Rest
Year 5 Class Teacher
